

SR 90/92, Campus Drive to Glenn Road

ADOT Project No. 090 CH 321 H714501L

Project Description

The Arizona Department of Transportation (ADOT) and the Federal Highway Administration (FHWA) are initiating a study for possible improvements along State Route (SR) 90/92 in Sierra Vista from Campus Drive on SR 90 at milepost (MP) 321.0, south to Glenn Road/Kachina Trail on SR 92 at MP 325.2. The study will be conducted to identify ways of improving traffic flow and the potential environmental, social, and economic impacts of the project.

Purpose

The purpose of the study is to evaluate improvements to the existing roadway to meet future traffic demand. Both SR 90 and SR 92 are major state highways that carry regional as well as local traffic. These routes carry traffic through the Sierra Vista community to destinations in Bisbee, Douglas, Mexico, and popular recreational sites throughout southeastern Arizona. The routes also provide access to local retail, commercial, and residential development. Traffic volumes will increase as the community and region continue to grow.

The study will identify the types of improvements needed to accommodate projected traffic volumes in 2035, such as constructing additional lanes and implementing access management in the study area. The environmental impacts that would result from constructing these improvements will be evaluated.
